

# Citrix Education Course Numbering Update

To better accommodate our growing portfolio of training offerings, Citrix Education has developed a new numbering convention for Citrix courses.

Designed to intuitively provide key information about the course, the new numbers consist of the following components

## Prefix

Prefixes reflect the respective product code for a given course, and are derived from the product name.

Examples:

Prefixes	Course Prefix
Citrix XenApp	CXA
Citrix XenDesktop	CXD
Citrix NetScaler	CNS

Exceptions to this prefix format exist for Combination offerings (prefix 'CMB') and Workshops (prefix 'WKS').

## Number

Course numbers uniquely identify each Citrix course and indicate increasing rigor between levels.

Deliverables with identical course titles but which differ by modality will have the same course number (i.e. CXA- 200-1I and CXA-200-1W).

The following course levels now apply:

Course Levels	
001-099	Sales Authorizations, Sales Methodology, Whiteboards
100-199	Architectural Overview, Technical Authorization
200-299	Administration, BOA
300-399	Support, Troubleshooting, Optimization, Monitoring
400-499	Analysis, Design, Solution-Based Courses
500-599	Analyzing, Designing across Citrix Solutions

### Version and Modality

Course Version will be indicated by numbers 1-9, allowing up to nine versions of a specific course.

Course modality will be identified as either an Instructor-led Training or an eLearning.

Modalities	
Instructor-led Training	I
Self-paced eLearning	W
